PROFESSIONAL PROFILE

Final-year Data Engineering & Artificial Intelligence Engineering student at ENSA Agadir, interested in Data Engineering and AI. Hands-on experience with ETL pipelines, data warehousing, Machine Learning, AI Agents / LLMs, and Full-Stack development. Motivated by transforming raw data into actionable insights.

EDUCATION

- **National School of Applied Sciences of Agadir (ENSA Agadir)**
Preparatory Classes — 2022–2024
Engineering Degree in Data Science, Big Data & Artificial Intelligence — 2024–2027
- **Baccalaureate in Physical Sciences**
Al Khawarizmi High School, Ait Amira — 2021–2022

PROFESSIONAL EXPERIENCE

- Full-Stack Web Development Intern – dweb Technology** **July 2025 – September 2025 | Agadir**
- Developed a full-stack web application for managing interventions carried out by technicians.
 - Built REST APIs using Spring Boot and optimized PostgreSQL queries.
 - Developed the frontend using React (Vite) and TypeScript.
- AI Agent Development Intern for ERP – NextAct Solutions** **July 2026 – September 2026 | Agadir**
- Developed an AI conversational agent for an ERP system, enabling natural-language queries over business data (inventory, sales, purchases, and quotations) using function calling with Ollama and the Groq API.
 - Built a secure PostgreSQL reporting database using views, an isolated schema, roles, and permissions, together with REST APIs using FastAPI and SQLAlchemy.
 - Developed React dashboards with KPIs, Recharts, filters, and data export.
 - Implemented semantic tool selection using embeddings, with a fallback mechanism.

PROJECTS

- **Delivery Delay Analysis – Pentaho PDI, MySQL, Power BI**
ETL pipeline + data warehouse and dashboard to analyze delivery delays and their key factors.
- **Airport Management System – React (Vite), FastAPI, Oracle (PL/SQL)**
Full-stack application with business logic implemented in PL/SQL (procedures, functions, triggers).
- **Smart Irrigation System – React (Vite), FastAPI, MLflow, Scikit-learn**
Full-stack application using ML models to predict plant water needs, comparison of four models via MLflow, and integration of a CNN (EfficientNet) enhanced through user feedback (RLHF).

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, PL/SQL, Java
- **Databases:** MySQL, PostgreSQL, Cassandra, MongoDB, pgAdmin, Oracle SQL Developer 24.3.1
- **Data Analysis & Manipulation:** Pandas, NumPy, Data Cleaning, EDA
- **Machine Learning / AI:** Scikit-learn, Supervised & Unsupervised Learning, Model Evaluation, MLP, CNN
- **Data Engineering:** ETL/ELT, Data Warehousing, dbt, Apache Airflow, Apache Kafka, Apache Spark
- **Data Visualization:** Matplotlib, Seaborn, Power BI
- **Generative AI & LLM Agents:** Function Calling, Prompt Engineering, Ollama, Groq API, Semantic Selection (Embeddings), RAG
- **Web Development:** FastAPI, SQLAlchemy, REST APIs, Spring Boot, React (Vite)
- **Tools & Environment:** Git & GitHub, Docker, Jupyter Notebook, Visual Studio Code, MLflow, DVC, DagsHub

SKILLS & CERTIFICATIONS

- **Certifications:** [AI Career Essentials](#) – ALX | [Data Analyst in Python](#) – DataCamp | [Git & GitHub Fundamentals](#) – DataCamp | [dbt Fundamentals](#) – DataCamp | [Intermediate SQL](#) – DataCamp | [Intro to Snowflake for Devs, Data Scientists, Data Engineers](#) – Snowflake | [Create Local LLMs with Python](#) – Packt
- **Languages:** Arabic (Native) | French (B2) | English (C1)
